### EWA net EPC WIS PICs installation instruction!

First of all let me say this: Windows Vista users won't be able to run EPC/WIS discs. They are not compatible!!! You can try installing in XP compatibility mode, but it didn't work for me. There are 2 solutions anyway: A - Make a Dual Boot of Vista and XP. It's a complex thing, and it may damage your boot files and bring you to format the whole PC. If you choose

this solution, try to Google to know how to do it. B – Install the free software MICROSOFT Virtual PC 2007

http://www.microsoft.com/downloads/details.aspx?displaylang=en&FamilyID=04d26402-3199-48a3-afa2-2dc0b40a73b6 so that you can emulate a virtual computer with XP under Vista without having to mess with your boot files. I choosed this solution, because i think it's easier and more safe (and it works great!!!). Again, if you choose this solution and need help with installing XP in Virtual PC -> GOOGLE!

Here it goes:

1) Open your EPC/WIS disc 1 and enter folder EWA. Search for file "setup.exe" and double click on it.

🖶 Installer Manager	X

10. To the right of the inscription Current MAC address see your MAC address in the form: 001485C05B51

Copy and paste it to the Keygen (ID), select number of users (1 if you're the only one using EPC/WIS), select an expiration date (not too far, i tried with year 2099 and the keys didn't work. 2020 is fine) and click "generate!" to get your own License Keys.

21. After the finish of the installation to run the EPC you should enter in the menu Start, in "Programs" - folder "EWA net" and run the page "EWA net". On the right you should select the section "Programs" and run the "EPC net". The WIS net base is installed in the same way as from the paragraph 24, you should just select the chapter WIS net. The launching is also similar.
